

Neonatal cranial ultrasound course: the essentials

Venue: Events Centre, Stewart House, 32 Russell Square, London WC1D 5DN

Date: Friday 20th November 2015 | 09:00 – 17:00

A one day lecture based course providing the essential skills to perform and interpret neonatal cranial ultrasound scans on the neonatal unit.

This course will cover:

- How to use an ultrasound scanner and get the best quality images
- Standard images and normal anatomy
- Germinal matrix and intraventricular haemorrhage
- Linear measurements of ventricular dilatation
- Preterm white matter abnormalities
- HIE and Doppler measurements
- Perinatal stroke

Cost: £150
