Introduction to Applied Genomics in the Clinic

Wednesday 21st September 2016
Leolin Price Lecture Theatre, UCL Institute of Child Health

Are you involved in managing or recruiting patients with genetic conditions? This course is an introduction to how Genomics applies to your clinical practice.

Course Directors:
Prof Maria Bitner-Glindzicz
Professor of Clinical and Molecular Genetics, UCL Institute of Child Health

Dr Sofia Christou-Savina
Senior Research Associate, UCL Institute of Child Health

Fees:
Early Bird: £175 (before 07/08/2016)
Standard: £200 (after 07/08/2016)

This one-day course is aimed general and specialist paediatricians and physicians, trainees in adult and paediatric medicine and surgery, and genetic nurses and counsellors. We will introduce participants to the cutting-edge genomics technologies, data analysis methods and resources that are increasingly being adopted by NHS laboratories. The course aims to explain how genomic medicine is becoming part of the day-to-day work of clinical laboratories and is based on real clinical cases. Participants will be directly involved in the analysis of genomic information through interactive learning and discussion. No specialist genomics or bioinformatics knowledge is assumed.
